

QUESTION : What are the disadvantages of using CSS ?

ANSWER :

DISADVANTAGES OF USING CSS _

There are a few downsides while using CSS. One must know these disadvantages so that he or she is aware and takes care of them while designing a website.

1. Confusion due to many CSS levels –

Beginners are more vulnerable to this issue. They might get confused while opting to learn as there are many levels of CSS such as CSS2, CSS3, etc.

2. Cross-Browser Issues –

Different browsers work differently. So, you have to check that changes implemented in the website via CSS codes are reflected properly among all browsers.

3. Security Issues –

Security is important in today's world driven by technology and data. One of the major disadvantages of CSS is that it has limited security.

4. Extra Work For Developers –

Design services are required to consider and test all CSS codes across different browsers for compatibility. Due to developers testing compatibility for different browsers, their workload increases.
