

QUESTION : What are the media types allowed by the CSS ?

ANSWER :

All kinds of media types allowed by the CSS are as followings:

1. **all** - Suitable for all devices.
2. **aural** – Intended for speech synthesizers.
3. **braille** – Intended for braille tactile feedback devices.
4. **embossed** – Intended for paged braille printers.
5. **handheld** – Intended for handheld devices (typically small screen, monochrome, limited bandwidth)
6. **print** – Intended for paged, opaque material and for documents viewed on screen in print preview mode.
7. **Projection** – Intended for projected presentations, for example projectors or print to transparencies.
8. **screen** – Intended primarily for color computer screens.
9. **tty** – Intended for media using a fixed-pitch character grid, such as teletypes, terminals, or portable devices with limited display capabilities.
10. **tv** – Intended for television-type devices.
